EXPERIENCE

IT Staff Intern, Pupuk Kujang **Aug 2024 - Nov 2024**

- Developed a student data management web application using Laravel 11, enabling efficient data processing, storage, and retrieval.
- Built a car showroom management website with dynamic backend features using Laravel 11, focusing on structured data handling and clean architecture.
- Collaborated with UI/UX designers to develop a movie ticket booking website, translating design mockups into functional web features using Laravel 11.
- Performed data migration by transferring company records from Excel spreadsheets into a web-based system, ensuring data accuracy and consistency.

PROJECTS

NotaKu - Invoice SaaS for UMKM **May - Jun 2026**

Personal Project · notaku.store (https://notaku.store)

- Built and launched a production freemium SaaS for Indonesian SMEs to create, send, and manage professional invoices with PDF export and WhatsApp sharing.
- Implemented Midtrans Snap payment gateway with webhook signature verification (timing-safe) and automated subscription downgrade via Vercel Cron.
- Engineered security layers: email verification (Resend), IDOR prevention, Zod validation, rate limiting, and HTTP security headers.
- Configured full production infrastructure: custom domain, Resend DKIM/SPF, Neon PostgreSQL, Better Auth, and Vercel CI/CD deployment.

TokoKu - Fullstack Marketplace **May 2026**

Personal Project

- Built a full-stack multi-seller marketplace using Next.js 16, TypeScript, Prisma ORM, and PostgreSQL with role-based access control for Buyer, Seller, and Admin.
- Implemented complete e-commerce flows covering product catalog, cart, multi-address checkout, payment integration, and real-time order tracking with automated status transitions.
- Integrated Midtrans Payment Gateway with webhook signature verification, automatic stock management, and order synchronization.
- Developed a Seller Dashboard featuring sales analytics, product and order management, image upload, and voucher system.
- Built secure REST APIs with JWT authentication, bcrypt hashing, rate limiting, and ownership validation across all endpoints.

AI Sales Page Generator **Apr 2026**

Technical Assessment - PT Dakwah Digital Network

- Built a Laravel 11 web application that transforms product information into persuasive sales pages using Google Gemini 1.5 Flash API, deployed on Laravel Cloud with PostgreSQL.
- Implemented background queue job architecture so AI generation runs asynchronously without request timeout, with auto-refresh polling every 5 seconds for real-time status updates.
- Built a 2-layer content moderation system combining keyword filtering and AI-based validation to ensure generated content meets usage policies.
- Added export features including HTML download and clipboard copy, with re-generation support for content variations and searchable generation history.

Personal Portfolio Website **Apr 2026**

Personal Project

- Built a responsive personal portfolio website using Next.js, TypeScript, and Tailwind CSS with smooth Framer Motion animations.
- Implemented a project showcase section and contact form with reusable component architecture.
- Deployed on Vercel with performance optimization, SEO-friendly structure, and fully responsive design across all devices.
